<i>Preface</i>	vii
<b>1 Introduction</b>	1
<b>2 Origins</b>	
2.1 What is Mathematics? . . . . .	7
2.2 Etymology . . . . .	11
2.3 Prehistoric Mathematics . . . . .	12
2.4 Babylonian Mathematics . . . . .	15
2.5 Egyptian Mathematics . . . . .	19
2.6 Indian Mathematics . . . . .	25
2.7 Chinese Mathematics . . . . .	31
2.8 Mayan Mathematics . . . . .	36
2.9 Greek Mathematics . . . . .	38
Thales . . . . .	41
Pythagoras . . . . .	42
Zeno, Hippocrates and Eudoxus . . . . .	46
Socrates, Plato and Aristotle . . . . .	49
Euclid . . . . .	56
Archimedes . . . . .	61
From Aristarchus to Hypatia . . . . .	67
<b>3 Basics</b>	
3.1 Learning Mathematics . . . . .	75
3.2 Logic and Sets . . . . .	76
3.3 Arithmetic . . . . .	89
3.4 Discrete Mathematics . . . . .	101
3.4.1 Combinatorics . . . . .	102
3.4.2 Simplified Model of Decimal Expansion . . . . .	105
3.4.3 Sequences, Recursion and Difference Equations . . . . .	107
3.4.4 Generating Functions . . . . .	111
3.4.5 Graph Theory . . . . .	114

3.5	Equations, Algebra and Complex Numbers . . . . .	131
3.6	Geometry . . . . .	145
3.7	Calculus . . . . .	164
3.7.1	Limits . . . . .	164
3.7.2	Derivation . . . . .	170
3.7.3	Integration . . . . .	179
3.8	Exponentiation and Logarithms . . . . .	193
3.9	Power Functions and Roots . . . . .	196
3.10	Trigonometry . . . . .	199
3.11	Power Series . . . . .	206
3.12	Differential Equations . . . . .	217
<b>4</b>	<b>Return</b>	
4.1	Reminiscence . . . . .	230
4.2	Reptends and Base . . . . .	230
4.3	Modular Arithmetic . . . . .	235
4.4	Periods and Prime Powers. . . . .	240
4.5	Exceptional Cases . . . . .	244
4.6	General Case . . . . .	260
4.7	Period of Primes . . . . .	262
<b>5</b>	<b>History</b>	
5.1	Islamic Period . . . . .	265
5.2	Classical Indian Period . . . . .	
5.3	Early European. . . . .	
5.4	Foundations. . . . .	
5.5	Geometry . . . . .	
5.6	Algebra . . . . .	
5.7	Analysis. . . . .	
<b>6</b>	<b>Linear Algebra</b>	

**Appendices**

A Exercises . . . . .

B Hints . . . . .

C Extensions . . . . .

    From Continued Fractions to Liouville Numbers . . . . .

    Examples of Generating Functions . . . . .

    Thermodynamics and Neural Networks . . . . .

    Statistical Mechanics and Phase Transitions . . . . .

    Discriminants and Symmetric Polynomials . . . . .

    Proof of Existence and Uniqueness for ODEs . . . . .

D Timelines . . . . .

E Notes . . . . .

F Programs and Apps . . . . .

G Information on Internet . . . . .

H Recommended Reading . . . . .

I Greek Letters . . . . .

J Symbols . . . . .

K Gray Sheets . . . . .

L Mini Biographies . . . . .

**Index** . . . . .
